

Launch an AWS instance

The screenshot shows the AWS Management Console interface for the EC2 Instances page. The left sidebar contains navigation links for EC2, Dashboard, AWS Global View, Events, Instances, Instance Types, and Instance Profiles. The main content area displays a table of instances. The table has columns for Name, Instance ID, Instance state, Instance type, Status check, Alarm status, Availability Zone, and Public IP. One instance is highlighted in blue, indicating it is the selected instance. The instance is named 'my-practise-se...', has an Instance ID of 'i-06ca9af1a2fb3817a', and is in the 'Running' state. The status check shows '3/3 checks passed'. The console also features a search bar, a filter dropdown set to 'All states', and a 'Connect' button.

Name	Instance ID	Instance state	Instance type	Status check	Alarm status	Availability Zone	Public IP
my-practise-se...	i-0a834b0a79ab10bee	Terminated	t3.micro	-	View alarms +	us-west-2b	-
my-practise-se...	i-06ca9af1a2fb3817a	Running	t3.micro	3/3 checks passed	View alarms +	us-west-2b	ec2-34-219-49-221.us-west-2.com

Connecting to AWS EC2 Instance using SSH

```
ubuntu@ip-172-31-29-207:~$ ssh -i practice-server-key.pem ubuntu@ec2-34-219-49-221.us-west-2.com
```

Installed NGINX

```
ubuntu@ip-172-31-29-207:~$ sudo apt install nginx

Add rule

Rules with source of 0.0.0.0/0 or ::/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only.
